“ FOUNDER LED: ”

I founded Unidine in 2001 because I had a vision of what food and dining management customers deserve - fresh, delicious food, enhanced choices, greater flexibility and top-notch service. To fulfill this vision, there needed to be a different kind of food and dining management company, one that blended culinary artistry, expertise in wellness, passion for service, strong management and the flexibility to customize a dining program suited to the unique characteristics of each organization that it served.

- Richard B. Schenkel, Founder & CEO of Unidine

ABOUT US:

Unidine operates in over 400 facilities, and is a leading provider of food and dining management services for clients throughout the United States. Since its founding in 2001 Unidine’s success derives from consistent execution in four key areas - an exclusive focus on food and dining management services, a commitment to scratch cooking with fresh, seasonal, responsibly sourced ingredients, exceptional customer service, and a corporate culture enlivened by each team member’s passion for culinary and service excellence.

APPROACH:

Unidine’s approach to senior living can be boiled down to three words: **family, excellence, and flexibility.** The word family is embodied in our commitment to treating residents, and the staff that supports them like family. In doing so their concerns, and needs become intertwined with our own. Excellence is present in each of our unique partnerships, between artisan food offerings, and top of the line customer service. Our organizational flexibility allows for carefully crafted solutions and services fitted to our partners needs now, and as they evolve into the future.

UNIDINE IN SENIOR LIVING:

Experiential dining, artisan food offerings, and industry leading hospitality sets Unidine apart as a leading provider and partner in senior living communities. As a boutique, responsive, and tactful organization, we are able to customize and craft our offerings to serve residents across the continuum of care despite variations in lifestyle needs, dietary restrictions, and dining preferences. Unidine's individualized solutions begin with a deep understanding of clients holistic business operations where we step back and ask ourselves "How can we improve residents' experience and satisfaction?" "How can we better streamline operations for our clients?" and ultimately "How can we create better health outcomes for this community?". We treat all our partners like family, and in doing so their success becomes intertwined with ours.

Our excellence is rooted in our mission and vision, and fueled by our hospitality-first mindset. In the process of becoming the industry leader in food and dining management services, we aim to redefine hospitality. Hospitality to us lies in the smaller often unseen moments like remembering how residents take their morning coffee, or celebrating a 70th wedding anniversary with a custom replica wedding cake. Our values are deeply ingrained into our organizational culture, and are demonstrated in the universal happiness of our clients.

Innovation continues to propel us into the forefront of leadership within senior living whether it's technological advancement, thought leadership, and consistent operational updates to better meet client and resident needs as they evolve.
